PROFESSIONAL EXPERIENCE

FM Global - Remote

Service Desk Technician

6/2024 – Current

- Handle 25–30 daily customer interactions in a high-volume, single point-of-contact help desk environment.
- Achieve and maintain 80%+ first-call resolution through advanced troubleshooting and diagnostic techniques.
- Provide support for Microsoft Outlook, Active Directory file shares, VPN connectivity, network issues, and software installations.
- Document incidents, resolutions, and troubleshooting steps in ServiceNow, ensuring accurate tracking and SLA compliance.
- Act as a customer advocate, delivering high-quality support to internal and external users while collaborating with team members to resolve complex issues.

Yorktel - Woodlawn, MD

SSA Support Engineer

9/2016 - 5/2024

- Collaborated with technicians to order and ship hardware, and diligently followed up on shipping and installation progress to ensure timely and accurate deployment of technology equipment.
- Monitored and supported live federal employee training sessions via Adobe Connect maintaining participant satisfaction ratings consistently above 95%.
- Assisted in the management and configuration of network devices for SSTV systems, including Active Directory administration and IP address allocation, ensuring optimal network performance and security.
- Facilitated accessibility for employees with disabilities to participate in Adobe Connect webinars and training, ensuring inclusive access through coordination with CADS. Provided support, transferred calls, and managed tickets to optimize participation and resolve issues promptly.
- Achieved an average resolution time of less than 3 days, exceeding SLA benchmarks and minimizing downtime for clients.

Oracle - Columbia, MD

Solution Analyst

9/2013 - 9/2016

- Provided proficient level two support, resolving complex technical issues utilizing the Knowledge Base, while crafting comprehensive product documentation and leveraging web resources and lab testing to ensure optimal product performance and end-user satisfaction.
- Reduced Mean Time to Resolution (MTTR) by 20% through implementing back-end troubleshooting methods involving log file analysis, database queries, and targeted MySQL database field updates.

Customer Support Analyst

8/2012 - 9/2013

- Responsible for providing technical and functional support to Oracle's global customer base via phone and electronic means.
- Verified customer's entitlement for support and collaborated with the Support Operations HOST team when entitlement wasn't clear.
- Handled a broad range of product or system related service requests.
