## PROFESSIONAL EXPERIENCE

### FM Global - Remote

#### Service Desk Technician | Jul 29, 2024 - Present

- Handle 25-30 daily customer interactions in a high-volume, single point-of-contact help desk environment.
- Achieve and maintain 80%+ first-call resolution through advanced troubleshooting and diagnostic techniques.
- Provide support for Microsoft Outlook, Active Directory file shares, VPN connectivity, network issues, and software installations.
- Document incidents, resolutions, and troubleshooting steps in ServiceNow, ensuring accurate tracking and SLA compliance.
- Act as a customer advocate, delivering high-quality support to internal and external users while collaborating with team members to resolve complex issues.

### Yorktel - Woodlawn, MD

#### SSA Support Engineer | 9/2016 - 5/2024

- Supported federal training environments via Adobe Connect, maintaining 95% + user satisfaction ratings.
- Managed and configured Active Directory accounts, IP allocations, and SSTV network devices.
- Coordinated hardware deployment logistics, ensuring timely delivery, setup, and operational readiness.
- Provided accessibility support in compliance with Section 504/508, improving participation for users with disabilities.
- Achieved an average resolution time of less than 3 days, consistently exceeding SLA expectations.

### Oracle - Columbia, MD

#### Solution Analyst | 9/2013 - 9/2016

- Provided level two support resolving complex technical issues using the Knowledge Base, product documentation, web resources, and lab testing to ensure optimal performance and end-user satisfaction.
- Reduced Mean Time to Resolution (MTTR) by 20% through back-end troubleshooting methods including log file analysis, database queries, and targeted MySQL database field updates.

#### Customer Support Analyst | 8/2012 - 9/2013

- Provided technical and functional support to Oracle's global customer base via phone and electronic channels.

vincent.t.mahee@gmail.com | Mobile: 443-758-3485 | Pikesville, MD 21208

- Verified customer entitlement for support and collaborated with the Support Operations HOST team when entitlement required clarification.
- Handled a broad range of product- and system-related service requests.

## EDUCATION

Johns Hopkins University – Online | Master of Science in Artificial Intelligence  
(Planned / Applicant)

University of Maryland University College – Largo, MD | Bachelor of Science in  
Computer and Information Science | 2015

## CLASSES AND TRAINING

- Federal Agency Training – Comprehensive training on SSA departments and systems, including privacy and data protection, information security, accessibility, and Section 504/508 compliance.
- University/Employee Training – MySQL, Java, Oracle Database, Cloud Applications, Solaris 11
- CompTIA A+ Certification – May 2010

## PROJECTS

### **ResolveAI – Multimodal Case Intelligence & Documentation Engine**

*AI-Powered IT Service Management (ITSM) Workflow Solution*

- Designed and conceptualized an AI-driven platform to transform fragmented service desk inputs, including voice transcripts, chat logs, and screenshots, into structured, ITIL-aligned incident documentation.
- Built a functional React-based UI prototype (ResolveAI Workspace) featuring multimodal ingestion, real-time transcription display, OCR extraction, and structured ticket outputs.
- Implemented ITIL v4-aligned documentation logic, including incident categorization, symptom analysis, troubleshooting logs, and resolution tracking.
- Architected a hybrid knowledge retrieval system integrating internal knowledge bases with controlled external web sources, ensuring source attribution and trust scoring.
- Integrated enterprise security and compliance considerations, including PII/PHI redaction, ISO 27001 alignment, SOC 2 readiness, and NIST AI Risk Management principles.

# VINCENT T. MAHEE

vincent.t.mahee@gmail.com | Mobile: 443-758-3485 | Pikesville, MD 21208

- Designed integration workflows for major ticketing systems, including ServiceNow, Jira Service Management, Zendesk, Freshservice, and Zoho Desk, with one-click data push capability.
- Focused on improving service desk efficiency, reducing manual documentation effort, and increasing consistency and quality of incident records.

## SKILLS

Assistive Technologies (Jaws/NVDA), Active Directory, Adobe Connect, Azure, Cloud Computing, Cybersecurity, Text-to-speech, TCP/IP, LAN, Linux, Inventory & Tracking, Networking, Office 365, Touchscreens, Remote Support, SQL, Virtualization

## PROGRAMMING LANGUAGES

C/C++, Java, MySQL, Python

## TICKETING SYSTEMS

HP Service Manager (CAPRS), Jira Service Desk, ServiceNow, Zendesk
